FAQs

Embark on wild adventures with the TS004, a thermal imaging monocular engineered to reveal the unseen, even in total darkness. Boasting a 13mm lens, it spots targets up to 450 yards (410 meters) away. With a recognition range of up to 100 yards (91 meters), it sees through fog and dense vegetation, revealing wildlife, people, and objects with ease. Tailored for outdoor enthusiasts, farmers, and zoologists alike, the TS004 empowers you to observe wildlife, navigate trails, camp under the stars, or conduct search and rescue missions with confidence.

Thermal Module

Resolution:
256*192

Focal Length:
13mm

Pixel Interval:
12μm

NETD:
< 40mK

Detection Range:
450yd

Field of View:
13.5° * 10.1°

Magnification:
1x, 2x, 4x, 8x

Frame Rate:
50Hz

Built-in Display:
640 × 480 LCOS Display

Battery

Battery Capacity:
5000mAh

Battery Life (Operating):
11 Hours

General

Storage:
Built-in 32GB

Protection Level:
IP67

Weight:
310g

Dimension:
180*64*54mm

Operating Temperature:
-4°F to 113°F (-20°C to 45°C)

Brief

Reveal the Unseen

The thermal monocular goes beyond visible light to deliver clear visuals even in complete darkness or low-light conditions. It features a **13mm lens** to deliver **up to 450yd detection range**, allowing you to spot wildlife from a distance or conduct search and rescue operations in challenging conditions.

Quick User Guide

Brief

Specs

Question: Can TS004 detect objects underwater, through glass or through a wall?

Answer: No. Infrared detectors mainly detect 8 to 14μm long-wave infrared areas, and can only be used to measure surface temperature.

Features

Question: Can any phone be connected to TS004?

Answer: Currently, TS004 supports phones with Android 7 or later OS and phones with iOS 12 or later OS.

Comparison
Chart

Question: Is the focus of the camera fixed or adjustable?

Answer: The infrared camera comes with a fixed focus. The user can turn the diopter adjustment knob to optimize the sharpness of the image displayed in the viewfinder.
