MacPherson Strut Spring Compressor

27036

Used to compress the strut
spring during cartridge
replacement.

Note: Always oil forcing screw prior to use.

Caution: Use only on MacPherson Strut Springs.
Do not begin to compress spring until safety
latches are in place.

Compressed springs are extremely dangerous, place
in metal locker while off vehicle.

1. Mount each hook over spring nearest to the end as possible.
The compressors should be mounted opposite each other.
2. Extend safety latches to lock hook to spring.

Caution: Always wear safety glasses
