Chrysler Harmonic Puller

- Used to remove the Harmonic Damper on most Chrysler/Mitsubishi engines. Its compact, low profile design eliminates the need to pull the radiator prior to removing the pulley in most cases.

27139

1. Carefully attach puller jaws to harmonic damper.
2. Turn center forcing screw in a clockwise direction until pulley is removed.

This puller is for hand operation only.
NOT FOR USE WITH POWER TOOLS.

Caution: Always wear safety glasses
